

Managed Firewall Services

Enhanced Network Security

Why A Cloud Firewall?

Centralized Rule Management

24/7 Updated Cloud-Based Security

Packet Level Inspection and Reporting

Category Content Filtering Add-On

PCI Compliance Testing Add-On

ZEROOUTAGES CLOUD FIREWALL KEEPS OUR CUSTOMERS WAN LINK SECURE

Centrally manage WAN security with audited firewall policies to prevent downtime.

Ensure that your Internet connection is secure and prevent unwanted inbound access from malicious attacks on your wide-area network connection. ZeroOutages cloud FW provides our customers with enhanced network-based security to block applications which are not specifically allowed, and to filter traffic accessed by end-users which may contain viruses and/or other unwanted data. ZeroOutages cloud firewall should always be deployed with device specific protection in an overlapping manner to improve security.
